A
FREQUENCY DICTIONARY
OF
CONTEMPORARY WRITTEN DORIC
OR
The NORTH EASTERN DIALECT of
SCOTS

For Educationists, Editors and Writers
whom require reassurance in their spelling choices,
and Corpus Planners who may be engaged
in increasing consistency within the written form

By CHRISTOPHER D. GILMOUR

Based on a six hundred thousand word
Corpus of 21st Century Doric Texts
Comprised of writing from
over 100 Moderns Doric writers

Draft Edition
Hertfordshire
2025

First published in Great Britain by ILL AND ANCIENT in March 2026

Typeset in L^AT_EX by Christopher D. Gilmour

Introduction

(Write introduction here)

It is with regret that I note that my words don't have some kind of inexplicable ability to influence nations.

Christopher D. Gilmour

(Month Year)

Hertfordshire, UK

0.1 How to use this dictionary

This dictionary is aimed at people who might not be as familiar with written Scots language as they may wish to be, editors, educators, fluent speakers who have never had the need to write it, interested linguists, politicians, dialecticians who are aching for a fight on social media.

There are two main sections:

First - a ranked dictionary of all the word forms from most frequently used - to roughly the 2,500th least frequently used. You may wish to idly browse this section.

Last - all the words and spelling variants in alphabetical order with references to the most common variant. The lazy subeditor might just use this section to nudge and correct spellings. I wouldn't recommend this behaviour, but realistically it is quicker than actually looking up each word, and making a quantitative judgement; this strategy will see you right nine times out of ten.

In contrast to other frequency dictionaries and word lists, each entry is designed to stand alone to some extent, without very much explanation of what the numbers mean or abbreviations. They may be copied and pasted for use in training materials.

This dictionary can also be used to weigh up the relative popularity of synonyms, for example BREEKS and TROOSERS (or troosers). We can see that the various spellings of BREEKS occur 64 times in the corpus, and spelling variants of TROOSERS occur 18 times - BREEKS is clearly more popular. This isn't a prescriptive dictat that writers should use one word of the other. If a writer means BREEKS, they should use BREEKS, and if they mean TROOSERS, they should use TROOSERS. But there is the edge case where if a writer isn't sure which word to use, or isn't confident, then knowing that BREEKS occurs more than three times more often than TROOSERS in Doric writing, then perhaps BREEKS is the appropriate word.

Where words only have single agreed spellings, synonyms are grouped together, for example SETTEE, SOFA and COUCH share a single dictionary entry to allow easy comparison.

There could be great philosophical discussions about the extent to which writers must obey the tyrannical rule of the standard, or the conventional spelling, and the extent to which they should surrender their personal or regional accent. It is the choice of the writer themselves. This dictionary modestly aims to let them make an informed choice.

Whilst some commentators might consider this to be an instrument of the rule by majority, and that writers will naturally choose the most common spelling, and thus give up their natural accent spelling. It's also possible that knowing there is a standard spelling, will allow writers to rebel away from it, to make the conscious choice to express their regional identity by not using the convention spelling - "Round here we spell words differently".

0.2 Parts of Speech

One aspect of this dictionary that ought to be discussed further is parts of speech that are recorded for each entry. There has been far more resources and expertise deployed in corpus linguistics and natural language processing of the English language than of Scots, and whilst the differences in grammar and orthography between the two tongues have been documented at length by many writers over many centuries, there are no Scots-specific part-of-speech tagging software.

I have used the CLAWS7 tagset developed by Lancaster University and their English part-of-speech tagging software to suggest the most appropriate part of speech for each wordform listed in this dictionary.

Acknowledgments

I would like to thank Dr Paul Rayson, Professor Vaclav Brezina, Dr Dana Gablasova for inspiring me to attempt a Frequency Dictionary.

Dr Rhona Alcorn and all at the Dictionaries of the Scots Language for supporting the Corpus of 21st Century Scots Texts project.

I must thank my wife and children for leaving me alone to get on with this for a few minutes at the end of each day.

None of this would be possible without the work of a hundred or so Doric writers, most of whom will never know that I have read their writings and counted their words here.

Finally, candour compels me to mention that during the Scots wikipedia re-write project in 2020, I'd written a perfectly good piece of Scots about the Moray village of Findhorn, and some random internet person went and edited it, changing the word "nearby" to "naurby". To a layperson, this might seem like an entirely reasonable change, perhaps "naurby" is better Scots than "nearby". Or perhaps not.

Its possible that the compilation of this frequency dictionary and other Scots frequency dictionaries in the series is entirely motivated by spite, to determine whether wikipedia editor YoungstownToast was right to make that change or if "nearby" as original written, was the most appropriate spelling.

all	317	34 writers
aw	299	20 writers
a	1,567	9 writers
ah	105	2 writers
aa	77	1 writer

17. BIT

adversative coordinating conjunction (CCB)

Frequency

704.63 per 100,000 - 4,667 tokens

Variants

bit	2,797	108 writers
but	1,870	98 writers
bot	nane	

18. NAE

article (AT), general adverb (RR) and interjection (UH)

Frequency

692.55 per 100,000 - 4,587 tokens

Variants

nae	3,969	112 writers
na	411	28 writers
naw	45	11 writers
nah	27	9 writers
nay	135	3 writers

19. SHE

3rd person sing. subjective personal pronoun (PPHS1)

Frequency

688.47 per 100,000 - 4,560 tokens

Variants

she	4,490	90 writers
shae	19	2 writers
shi	51	2 writers

20. HIS

3rd person sing. objective personal pronoun (PPHO1)

Frequency

651.93 per 100,000 - 4,318 tokens

Variants

his	4,285	99 writers
hes	22	4 writers
heez	11	1 writer

21. MA

possessive pronoun, pre-nominal (APPGE)

Frequency

623.10 per 100,000 - 4,127 tokens

Variants

ma	3,117	88 writers
my	865	69 writers
mi	109	6 writers
mah	36	2 writers

22. HER

3rd person sing. objective personal pronoun (PPHO1)

Frequency

622.19 per 100,000 - 4,121 tokens

Variants

her	3,792	92 writers
er	329	20 writers

23. AS

general preposition (II), as (as conjunction) (CSA) and degree adverb (RG)

Frequency

573.58 per 100,000 - 3,799 tokens

Variants

as	3,380	110 writers
es	380	10 writers
eis	22	2 writers
ass	17	2 writers

24. FIT

wh-determiner (DDQ)

Frequency

569.95 per 100,000 - 3,775 tokens

Variants

fit	3,306	100 writers
what	247	37 writers
whit	143	26 writers
fat	68	11 writers
fut	11	2 writers
whut	nane	
wit	nane	

25. AT

general preposition (II)

Frequency

558.18 per 100,000 - 3,697 tokens

Variants

at	3,697	88 writers
----	-------	------------

26. OOT

prep. adverb, particle (RP) and general preposition (II)

Frequency

545.34 per 100,000 - 3,612 tokens

Variants

oot	3,471	116 writers
out	137	31 writers
oat	4	3 writers

27. IS

the verb is (VBZ)

Frequency

489.02 per 100,000 - 3,239 tokens

Variants

is	3,166	110 writers
iz	73	3 writers

28. UP

prep. adverb, particle (RP) and general preposition (II)

Frequency

486.16 per 100,000 - 3,220 tokens

Variants

up	3,220	113 writers
----	-------	-------------

29. BE

be verb base form (VBO)

Frequency

477.40 per 100,000 - 3,162 tokens

Variants

be	3,162	113 writers
----	-------	-------------

Conjugation

VBO - BE

VBM - AM

VBZ - IS, bes

VBR - ARE, ir

VBG - BEIN, being

VBDZ - WIS, was, wes, wus

VBDR - WERE, wir, war, wur, wer

VBN - BEEN, bin

30. YER

possessive pronoun, pre-nominal (APPGE)

Frequency

467.89 per 100,000 - 3,115 tokens

Variants

yer	2,594	76 writers
your	320	50 writers
you're	49	20 writers
yir	136	15 writers
ur	16	6 writers

YOUR and YOU'RE have been grouped together, as YER is used as both a contraction and for possession

31. LIKE

base form of lexical verb (VV0), general adjective (JJ), general preposition (II), general adverb (RR), singular common noun (NN1) and subordinating conjunction (CS)

Frequency
462.76 per 100,000 - 3,065 tokens

Variants		
like	2,652	91 writers
lik	226	18 writers
lek	101	3 writers
lyke	57	2 writers
likk	8	2 writers
leck	21	1 writer

Conjugation

VV0 - LIKE, lik
VVZ - LIKES
VVG - LIKIN, liking
VVD - LIKED
VVN - LIKED

32. FAE

general proposition (II)

Frequency
434.52 per 100,000 - 2,878 tokens

Variants		
fæ	2,218	100 writers
frae	588	18 writers
from	72	23 writers

33. HID

the verb had (VHD) and (VHN)

Frequency
429.24 per 100,000 - 2,843 tokens

Variants		
hid	2,055	82 writers
had	331	55 writers
haed	177	10 writers
hud	16	4 writers
hed	238	3 writers
haid	26	1 writer

See HAE

34. THEY

3rd person plural subjective personal pronoun (PPHS2)

Frequency
428.48 per 100,000 - 2,838 tokens

Variants		
they	2,688	100 writers
thay	50	6 writers
ey	84	5 writers
ee	16	2 writers

35. JIST

general adverb (RR)

Frequency
427.12 per 100,000 - 2,829 tokens

Variants		
jist	2,493	98 writers
just	195	44 writers
juist	40	6 writers
jeest	12	4 writers
jis	34	2 writers
jus	2	2 writers
joost	53	1 writer
chust	nane	
cheust	nane	
chuss	nane	

36. THERE

locative adverb (RL) and existential there (EX)

Frequency
413.69 per 100,000 - 2,740 tokens

Variants		
there	1,788	107 writers
ere	646	23 writers
er	142	9 writers
ther	50	8 writers
aire	73	4 writers
thare	41	3 writers

37. WE

1st person plural subjective personal pronoun (PPIS2)

Frequency
411.42 per 100,000 - 2,725 tokens

Variants		
we	2,725	96 writers

38. FAN

subordinating conjunction (CS) and wh- general adverb (RRQ)

Frequency
410.52 per 100,000 - 2,719 tokens

Variants		
fan	1,142	89 writers
fin	1,173	49 writers
when	253	34 writers
whan	74	9 writers
faan	21	6 writers
whin	30	4 writers
fen	26	4 writers

39. ME

1st person sing. objective personal pronoun (PIO1)

Frequency
403.87 per 100,000 - 2,675 tokens

Variants		
me	2,260	100 writers
ma	377	11 writers
mi	38	3 writers

40. SAID

past tense of lexical verb (VVD), past participle of lexical verb (VVN) and general adjective (JJ)

Frequency
397.68 per 100,000 2,634 tokens

Variants

said	2,119	73 writers
sayed	48	3 writers
sade	466	1 writer
sayd	1	

See SAY

41. THIS

singular determiner (DD1) and degree adverb (RG)

Frequency
396.78 per 100,000 - 2,628 tokens

Variants

this	1,506	92 writers
iss	482	15 writers
ess	247	12 writers
eiss	28	3 writers
thes	12	2 writers
eis	334	1 writer
theis	19	1 writer

42. ABOUT

general preposition (II), degree adverb (RG) and prep. adverb, particle (RP)

Frequency
372.77 per 100,000 2,469 tokens

Variants

about	2,335	99 writers
about	134	32 writers

43. HAE

the verb have (VH0)

Frequency
365.52 per 100,000 - 2,421 tokens

Variants

hae	1,366	81 writers
hiv	658	65 writers
have	233	37 writers
hev	85	2 writers
haev	17	2 writers
ha'	10	2 writers
hay	52	1 writer

Conjugation

VV0 - HAE
VVZ - HAS
VVG - HAEIN, having
VVD - HID
VVN - HID

44. DOON

prep. adverb, particle (RP), general preposition (II), general adjective (JJ), singular common noun (NN1) and base form of lexical verb (VV0)

Frequency
345.90 per 100,000 - 2,291 tokens

Variants

doon	2,171	102 writers
down	33	18 writers
doun	7	8 writers

45. WID (would)

modal auxiliary (VM)

Frequency
345.29 per 100,000 - 2,287 tokens

Variants

wid	1,702	80 writers
would	106	34 writers
wad	469	14 writers
wud	8	2 writers
wuid	2	1 writer

46. SO

general adverb (RR), degree adverb (RG) and subordinating conjunction (CS)

Frequency
328.68 per 100,000 - 2,177 tokens

Variants

so	1,232	90 writers
sae	880	57 writers
se	65	2 writers

47. HIM

3rd person sing. objective personal pronoun (PPHO1)

Frequency
318.57 per 100,000 - 2,110 tokens

Variants

him	1,869	76 writers
im	241	21 writers

48. OWER

general preposition (II) general adjective (JJ), prep. adverb, particle (RP) and singular common noun (NN1)

Frequency
310.72 per 100,000 - 2,058 tokens

Variants

ower	1,838	87 writers
over	33	19 writers
owre	62	7 writers
o'er	62	4 writers
oer	39	3 writers
oar	14	2 writers
oor	10	2 writers

49. DINNA

negated form of verb do (VDX)

Frequency

308.30 per 100,000 - 2,042 tokens

Variants

dinna	1,101	66 writers
didna	637	58 writers
didnae	122	23 writers
dinnae	84	16 writers
don't	31	15 writers
didn't	7	6 writers
dina	28	4 writers
dinae	25	3 writers
didni	5	1 writer
dinnaye	2	1 writer
dinny	nane	
dunna	nane	
daena	nane	
dunnae	nane	

50. TILL

general preposition (II) and subordinating conjunction (CS)

Frequency

303.02 per 100,000 - 2,007 tokens

Variants

till	1,614	50 writers
until	96	31 writers
til	213	29 writers
tull	84	6 writers

51. DAY

temporal noun, singular (NNT1)

Frequency

300.45 per 100,000 - 1,990 tokens

Variants

day	1,990	98 writers
-----	-------	------------

Plural

DAYS

52. THEM

3rd person plural objective personal pronoun (PPHO2)

Frequency

284.75 per 100,000 - 1,886 tokens

Variants

them	1,472	75 writers
em	265	24 writers
thaim	110	7 writers
thim	27	2 writers
tham	12	1 writer

53. NOO

quasi-nominal adverb of time (RT) and subordinating conjunction (CS)

Frequency

285.50 per 100,000 - 1,891 tokens

Variants

noo	1,691	94 writers
now	116	35 writers
nou	84	7 writers

54. IF

subordinating conjunction (CS)

Frequency

283.99 per 100,000 - 1,881 tokens

Variants

if	1,228	90 writers
gin	502	34 writers
iv	102	5 writers
eif	46	1 writer
gif	3	1 writer

55. OR

coordinating conjunction (CC)

Frequency

275.39 per 100,000 - 1,824 tokens

Variants

or	1,824	92 writers
----	-------	------------

56. WERE

the verb were (VBDR)

Frequency

258.03 per 100,000 - 1,709 tokens

Variants

were	859	76 writers
war	521	29 writers
wir	121	21 writers
wer	186	7 writers
wur	22	5 writers

57. DAE

do, base form (finite) (VD0)

Frequency

257.42 per 100,000 - 1,705 tokens

Variants

dee	701	51 writers
dae	346	42 writers
div	415	38 writers
do	213	32 writers
di	30	9 writers

Conjugation

VV0 - DEE, dae

VVZ - DIS, daes, dees

VVG - DEEIN, daein

VVD - DEEN, done

VVN - DEEN, done

58. KEN

base form of lexical verb (VV0)

Frequency

248.97 per 100,000 - 1,649 tokens

Variants

ken	1,619	87 writers
kane	22	4 writers
cain	8	1 writer
kenn	nane	
kaen	nane	

59. AWA

locative adverb (RL) and general adjective (JJ)

Frequency

237.49 per 100,000 - 1,573 tokens

Variants

awa	1,410	93 writers
away	43	23 writers
aawye	29	11 writers
awye	12	5 writers
awaa	59	4 writers
awy	11	2 writers
aweiy	9	1 writer

60. BY

general preposition (II) and prep. adverb, particle (RP)

Frequency

236.59 per 100,000 - 1,567 tokens

Variants

by	655	83 writers
bi	877	34 writers
bye	35	14 writers

61. BACK

singular common noun (NN1), general adjective (JJ), prep. adverb, particle (RP) and base form of lexical (VV0)

Frequency

231.00 per 100,000 - 1,530 tokens

Variants

back	1,437	92 writers
baak	93	2 writers

62. WEEL

general adverb (RR) and general adjective (JJ)

Frequency

229.19 per 100,000 - 1,518 tokens

Variants

weel	1,305	85 writers
well	213	49 writers

63. GET

modal auxiliary (VM) and base form of lexical verb (VV0)

Frequency

226.77 per 100,000 - 1,502 tokens

Variants

get	1,317	95 writers
git	185	15 writers

Conjugation

VV0 - GET, git
 VVZ - GETS
 VVG - GETTIN, getting
 VVD - GOT
 VVN - GOTTEN, GOT

64. BEEN

the verb been (VBN)

Frequency

226.17 per 100,000 - 1,498 tokens

Variants

been	974	85 writers
